Investment Officer

Submitted by: Irene Lui
Controller-Treasurer

DATE: May 22, 2012

TO: Board of Supervisors

FROM: 
Vinod K. Sharma
Director, Finance Agency

SUBJECT: County of Santa Clara Quarterly Investment Review as of March 31, 2012

RECOMMENDED ACTION

Accept and authorize filing of Detailed Investment Portfolio Listing for period ending March 31, 2012.

REASONS FOR RECOMMENDATION

The Santa Clara County Treasury Investment Portfolio Report as of March 31, 2012, is submitted for your review and acceptance in compliance with State of California Government Codes 783 and 784, Statutes of 1995 and in compliance with County policy.

CHILD IMPACT

The recommended action will have no/neutral impact on children and youth.

SENIOR IMPACT

The recommended action will have no/neutral impact on seniors.

SUSTAINABILITY IMPLICATIONS

The recommended action will have no/neutral sustainability implications.

BACKGROUND

Each quarter, an investment report is submitted to the Board of Supervisors that provides a management summary with a clear status of the current investment portfolio, quarterly transactions, investment philosophy, and market actions and trends. Preparation of the report is required by both the Board's Policy Manual and the County's investment policy. All investment activities during the reporting period were conducted under the guidance of the investment policy. The Board reviewed and approved the most recent proposed changes to the policy at its April 10, 2012, meeting.

Securities Lending Disclosure

On December 5, 2006, the Board of Supervisors passed a resolution amending the County's investment policy to include securities lending as a permitted investment. The primary objective was to enhance income for the Commingled Pool through a low-risk transaction. The County's Treasury retained its custody bank, the Bank of New York Mellon, to serve as agent and to manage its securities lending program. Treasury began lending securities in October of 2008.

Outstanding loaned securities as of March 31, 2012, amounted to a market value of \$23,770,781.83.

Securities lending is a transaction in which the County Treasury lends securities it owns to a counter-party/borrower (a financial institution) in exchange for a pledge of cash collateral. The cash collateral is held by our custodial bank and invested in money market funds to earn incremental income to offset custody banking and investment research fees. The County Treasury retains all ownership rights to coupon interest earned by securities while out on loan to the counter-party/borrower. The borrower is obliged to return the securities, either on demand from the County or at the end of any agreed upon term.

Attachment A provides a summary of market values versus costs for the Commingled Pool and segregated investments. Segregated investments were established for several purposes.

One is to enhance yield where cash flow projections show the funds are not needed for immediate use. This allows for the purchase of longer-term investments that generally provide a higher yield. A second purpose of segregating funds is to establish accounts that match bond funded construction programs by holding maturities that match draw down schedules.

Attachment B gives a snapshot view of the types of investments and a maturity break down within the the Commingled Pool.

Attachments C 1 and C 2 provide asset allocation and performance data for the Retiree Health Fund.

Attachment D is a chart that provides a one-year visual comparison of the yields of the Commingled Pool, the CA State Treasurer's investment pool (LAIF) and the two-year and six-month Treasury notes.

The Investment Portfolio Holdings Report is a detailed investment report that lists each investment managed by the County Treasury, including the respective purchase and maturity date, par value, amortized and historical cost, present value and yield to maturity. The market values of securities were taken from pricing services provided by the Bank of New York Mellon, Bloomberg Analytics, dealer quotes and an independent pricing service.

Auditor's Review is contained in the last attachment. The investment portfolio is in compliance with the current investment policy.

A combination of securities maturing, new revenues and tax receipts will adequately cover the anticipated cash flow need for the next six months.

There were no reverse repurchase transactions in this quarter.

INVESTMENT REVIEW AND STRATEGY

March 31, 2012

The economy displayed modest strength during the quarter ending March 31, 2012 and offered confirmation that the two year economic recovery is gradually accelerating. Gross domestic product, the value of all goods and services produced by the U.S., rose at a 2.2 percent annual rate after advancing 3 percent in the previous three months. Consumer spending undoubtedly boosted the economy's growth. Several factors accounted for strong spending including unseasonably mild temperatures, resilience to higher gas prices and recent improvements in the labor market which gave consumers the confidence and means to spend. Total spending increased by 2.9 percent. Stocks moved higher along with the economy in the first quarter. The Standard & Poor's 500 Index increased 12.5 percent indicating the strongest three month start to a year since the first quarter of 1998. Amid signs of an improving economy, Federal Reserve policy makers appear to be holding off on launching additional programs to reduce market interest rates but as expected, will continue their policy of keeping interest rates near zero and "exceptionally low" at least through late 2014. Treasury bond yields drifted modestly higher during the quarter and since quarter-end have reversed and moved lower. The two and ten year treasury notes increased by 7 and 23 basis points and ended the quarter yielding 0.33 and 2.21 percent, respectively.

In March, the unemployment rate fell to 8.2 percent from 8.3 percent. Even though the addition of only 120,000 jobs in March was much lower than projected and somewhat disappointing, general agreement exists that labor markets have improved. Payrolls increased by 635,000 from January through March. This was the largest quarterly gain since the first three months of 2006. The downward trend in applications for unemployment benefits also indicates improvement. Part of the slowdown in March may have resulted from a warmer winter, which prompted some employers (i.e. construction) to hire and/or retain more workers than they otherwise would have done. Hiring was flat in many industries. Retail-store employment dropped by 34,000 despite a recent rise in consumer spending, while construction payrolls decreased by 7,000. Temporary-help jobs, often seen as a harbinger of labor market trends, fell by 7,500 after rising by nearly 55,000 in February.

Consumer spending, which accounts for approximately 70% of the domestic economy, picked up steam. Based on recent indicators, leadership in the current economic recovery appears to be shifting from spending by businesses to consumer spending. Consumer confidence has trended higher. Retail sales in the U.S. increased more than expected in March. The 0.8 percent gain was almost three times as large as projected and followed a 1 percent increase in February according to the Commerce Department. New vehicle sales surged in January and February but slowed slightly in March. Sales in department stores, clothing shops, home improvement centers and restaurants displayed improvement. Strength in consumer spending was surprising given that fuel costs climbed. According to AAA, the biggest U.S. motoring club, regular fuel in March averaged \$3.84 a gallon. Prices have risen 20 percent this year and are 6.8 percent above a year ago. The last time gas was at \$4.00 a gallon in 2008, consumers did not have many alternatives to improve mileage in the face of higher gasoline prices. In contrast to earlier

periods, even SUVs and light trucks get considerably better mileage providing consumers with greater insulation from higher pump prices. Sluggish income growth remains a concern. Growth in spending cannot be sustained without income growth. Real per capita after-tax income has declined in three of the past four months and is essentially unchanged over the past year.

Production at U.S. factories is a key indicator that explains spending trends. Manufacturing, which makes up about 75 percent of industrial output and accounts for about 12 percent of the U.S. economy, decreased 0.2 percent in March primarily as a result of cutbacks from appliance and furniture makers. The slight decline followed a revised 3.4 percent gain from December through February that marked the biggest three-month jump since 1984. Production reports also showed auto making climbed 0.6 percent in March after a 0.8 percent rise the prior month. Cars last quarter sold at the fastest pace in four years, according to industry data. The strength of the U.S. is very different than the weakness in manufacturing globally, particularly in Europe. Early in the recovery, global demand helped U.S. manufacturers compensate and offset weak domestic demand at home. The increase of 0.2 percent in the production of business equipment is a reminder that domestic capital investment along with other U.S. based demand continues to spur manufacturing.

Home prices in 20 U.S. cities dropped at a slower pace in February, possibly indicating some degree of stabilization in the real estate market. The S&P/Case-Shiller index of property values fell 3.5 percent from a year earlier, the smallest 12-month drop since February 2011. Milder weather, an improving labor market and low borrowing costs supported demand. The average rate on a 30-year fixed mortgage reached an all-time low of 3.87 percent in February and was just slightly higher at 3.88 percent in the week ending April 12, according to data from Freddie Mac. Of note, home buyers have shifted their interest away from new construction to existing properties. Existing homes are currently a cheaper alternative to new properties. The difference between the median price of an existing and new single-family house was more than \$76,000 in February, near the widest gap on record and more than \$50,000 larger than when the recession began. Nevertheless, housing starts (the number of new structures beginning construction in the multifamily sector) continue to strengthen. Multi-family properties posted an 85.4 percent year-over-year increase primarily driven by strong demand in the apartment market.

The European debt crisis, even after recent initiatives, continues as a concern for global credit markets. The emergency three year loans distributed to 800 European banks by the European Central Bank (ECB) along with the restructuring of Greek debt calmed markets but many fundamental problems remain unaddressed. Bank and sovereign debt levels in many countries remain uncomfortably high and most recently, political backlash has emerged over fiscal austerity and other perceived unfair government budget cutbacks. In addition, a great deal of attention has recently focused on rising interest rates, a reversal in direction in both Spain and Italy, particularly since the increase is accompanying weaker economic growth. The latest economic reports confirm that the economies of both Spain and the U.K have entered in to recession.

Our portfolio strategy remains focused on the purchase of high quality assets and on those issuers whose credit strength is bolstered by U.S. government support which we still view as our best credit alternative. The quality standards set by the investment policy, under which the Pool is managed, for

most of our securities, are higher than those required by state code. Government sponsored enterprises (GSEs) FHLMC, FNMA and FHLB will remain core holdings. Legislation enacted in July 2008 reaffirmed and strengthened the support available from the U.S. government for the GSEs. Furthermore, the significant ownership stake (80 percent) in FNMA and FHLMC that has been assumed by the U.S. Treasury provides senior debt holders with ample credit support. Currently, FNMA and FHLMC guarantee \$5.5 trillion of U.S. home mortgages. We also like bank debt that is secured by FDIC and NCUA guarantees. This debt benefits from the full faith and credit of the U.S. government for timely return of both principle and interest.

Given that the Fed has projected that Fed Funds will remain in its target range of 0.0% to .25% until the winter of 2014, we now believe that in general interest rates will stay at trough levels at least over the next two to three years. The amount of time it takes for the economy to attain a more adequate rate of growth will solely determine how long rates remain this low. As portfolio bonds with attractive coupons mature those proceeds must be reinvested at lower rates, lowering the overall pool's acquisition yield. Given that we expect interest rates will eventually move upward, we want to position the portfolio to fully take advantage of interest rates moving upward whenever that occurs. We realize a material change in rates may not occur until late 2014. Nevertheless, our bias is to defensively structure the portfolio so that it is less sensitive to interest rate shifts and its market value is shielded from significant declines. We continue to look selectively at callable securities. They are typically bought as surrogates for securities with short maturities but also may offer an attractive yield pick-up relative to those non-callable bonds with a comparable maturity. We also find some floating rate securities attractive. These securities have coupons that change quarterly, are pegged to LIBOR, a commonly used rate to define interest costs, and therefore have the ability to reset in concert with higher rates. Certain high quality sectors such as asset backed securities (ABS) and taxable municipals are attractive on a risk adjusted basis. And lastly, during those periods when we find the yield curve steep, slightly longer securities that are advantaged by the curve, add value to the portfolio.

Weighted Yield	0.82%	0.86%	0.84%	0.99%

*These accounts reflect two components of the Retiree Health Fund. The third component is included in the Commingled Pool.

**Yield to maturity (YTM) is the rate of return paid on a bond, note, or other fixed income security if the investor buys and holds it to its maturity date and if the coupon interest paid over the life of the bond is reinvested at the same rate as the coupon rate. The calculation for YTM is based on the coupon rate, length of time to maturity, and market price at time of purchase.

Yield is a snapshot measure of the yield of the portfolio on the day it was measured based on the current portfolio holdings on that day. This is not a measure of total return, and is not intended to be, since it does not factor in unrealized capital gains and losses and reinvestment rates are dependent upon interest rate changes

***Individual securities within municipal security accounts are from time purchased at a premium price. The purpose of the price premium is to adjust the bond's price higher as an offset to the bond's above market coupon. With the passage of time, the price of the security approaches par because that is what the holder will receive at maturity. At this time, because of the premium, and not necessarily due to a decline in value, the security's cost will exceed its market value.

1. Treasury contracted the Bank of New York (BONY) to provide custodial banking services including performance measurement starting on February 1, 2008. Return calculations are available after this date. The fixed income returns provided by BONY are AIMR (Association for Investment Management and Research) compliant and are consistent with industry standards. Given the difference in computation methodology, prior returns will not be combined with current returns.

2. Retiree Health & Commingled yield respectively: **3.16%** **0.75%**
 Retiree Health & Commingled Duration respectively: **4.22** **1.09**
Duration is a common gauge of the price sensitivity of a fixed income asset or portfolio to a change in interest rates. It takes into account imbedded options and that expected cash flows will fluctuate as interest rates change.

3. The selection of this benchmark is intended to reflect a target mix of a portfolio emulating longer duration liabilities.

4. ML US Treas Bills, 0-3 Mo = 30%, ML Govt/Corp 1-3 yr AA rated & above = 70%

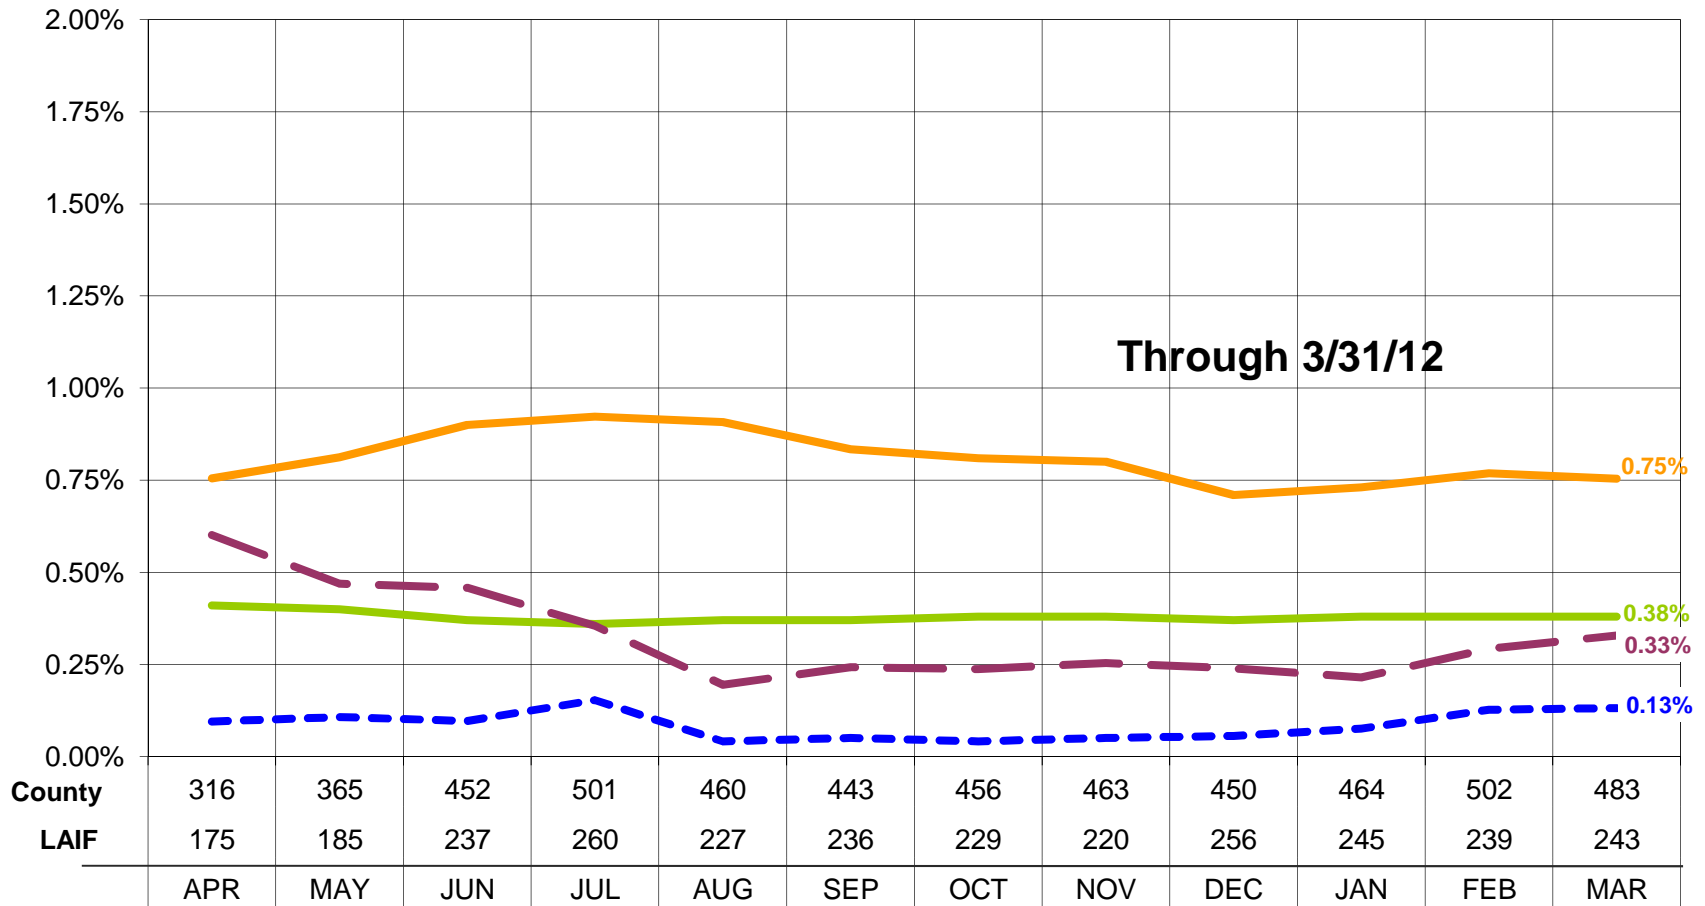

5. The individual fund total returns for the equity portfolio are calculated by BONY. They are time weighted returns that appropriately weight deposits and withdrawals. Returns are AIMR (Association for Investment Management and Research) compliant and are consistent with industry standards. Index returns assume that there are no new investments or withdrawals.

6. The current equity holdings represent the residual left after other holdings were liquidated and the proceeds transferred to the California Employer's Retiree Benefit Trust, an investment trust managed by CalPERS. The trust was established to contain employer contributions to fund future health and other post-employment benefit costs for retirees.

7. The FAF loan is a 5 year loan maturing on 12/31/15 and is priced using an equal maturity agency bond. Please see see Attachment C1 for further detail regarding the FAF loan.

Board of Supervisors
County of Santa Clara

**INDEPENDENT AUDITOR'S REPORT
APPLYING AGREED-UPON PROCEDURES
CASH AND INVESTMENTS**

We have performed the procedures enumerated below on the cash and investments in the County's commingled fund as of March 31, 2012. The procedures were agreed to by the Director, Finance Agency to determine whether the accountability for the cash and investments by the Controller-Treasurer's Department is accurate and whether investments comply with the County's policies and State law.

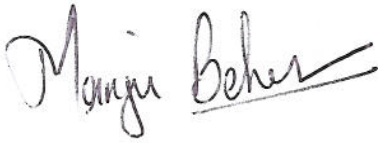

Based upon the work performed, we found that investments comply with County policy and State law and that cash and investments are accounted for in the Accounting and Treasury Divisions of the Controller-Treasurer's Department in accordance with policy and established procedures. No material exceptions or irregularities were noted.

The procedures applied follow:

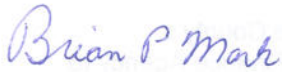

- a. On March 31, 2012, there was no material difference between the accounting for cash and investments maintained by the Treasury Division and the records of the Accounting Division.
- b. For the securities purchased in March and held at March 31, 2012, we compared the issuers' credit ratings to the minimum rating requirements to determine compliance with County policy and State law.
- c. We identified and/or computed the investment limitations for each type of investment and tested actual investments by type and issuer to the limitations permitted by law and policy.
- d. We tested the automated system's computation of the weighted average of maturities to the maximum permitted by policy (the accuracy of the system was previously tested).
- e. We compared the cash and securities held by the depository and custodial banks to these banks' equity balances and verified the deposit/equity or securities book value/equity ratios were within the legal requirements.
- f. We examined supporting documentation for the purchase of investments.

Board of Supervisors: Mike Wasserman, George Shirakawa, Dave Cortese, Ken Yeager, Liz Kniss
County Executive: Jeffrey V. Smith

- g. We determined the existence of investments held in safekeeping by comparing the investments included in the County custodian's records with the details of the County's investment listing.
- h. From the schedule of investments, we examined individual investments with maturity dates exceeding one year and tested the receipt of interest. We reviewed the amounts recorded as revenue received to the amounts reported by the custodial bank as actually received.
- i. We reviewed the reconciliation, completed as of March 31, 2012, of the County's depository account bank balance to the Treasury Division's accountability to determine whether all transactions are valid and are being accounted for in accordance with policy and in a timely manner. There were two school district reconciling items over thirty days with an absolute value total of \$3,439.79. County policy requires reconciling items be cleared within 30 days.
- j. We determined the existence of bank accounts by confirming the balances with the depository banks and with the State's Local Agency Investment Fund.
- k. We verified the existence of the items listed on the Schedule of Investments by Fund that is submitted to the Board with the quarterly investment report.

Manju Beher
Supervising Internal Auditor

Brian P. Mark
Auditor-in-charge
